

SUCCESS STORIES

In Corporate Wellness, quantified tangibles success is evaluated through **Health Improvement & Return on Investment**.

1. **Health Improvement:** comprises two main areas:
 - a. **Health Facilities: provided by the organization** and its utilization by employees. Such facilities usually include some or all of the following:
 - i. Health Insurance/ Hospitalization
 - ii. Medical Checkups
 - iii. Health Education
 - iv. Gym & Sports Facilities
 - v. Healthy Canteen Foods
 - b. **Employee Health: improvement by individual and group** in the following major areas:
 - i. Physical Fitness
 - ii. Stress
 - iii. Smoking
 - iv. Risk Reduction
 - v. Nutrition
 - vi. Health Score
2. **Return on Investment:** It evaluates the returns/ profits the organization get on the money it spends in improving the employee health. Such factors include:
 - a. Reduction in sick leave
 - b. Reduction in medicare cost
 - c. Higher workplace productivity, etc
3. **We represent our success** by highlighting the year on year health statistics:
 - a. The cumulative worker health statistics of Ras al Khaimah
 - b. The comparative health statistics of RAK Ceramics
 - c. The 2 year health profile of Stevin Rock
 - d. The 2 year health profile of RAK Ports
 - e. The 2 year review of Hilton Hotel Executives

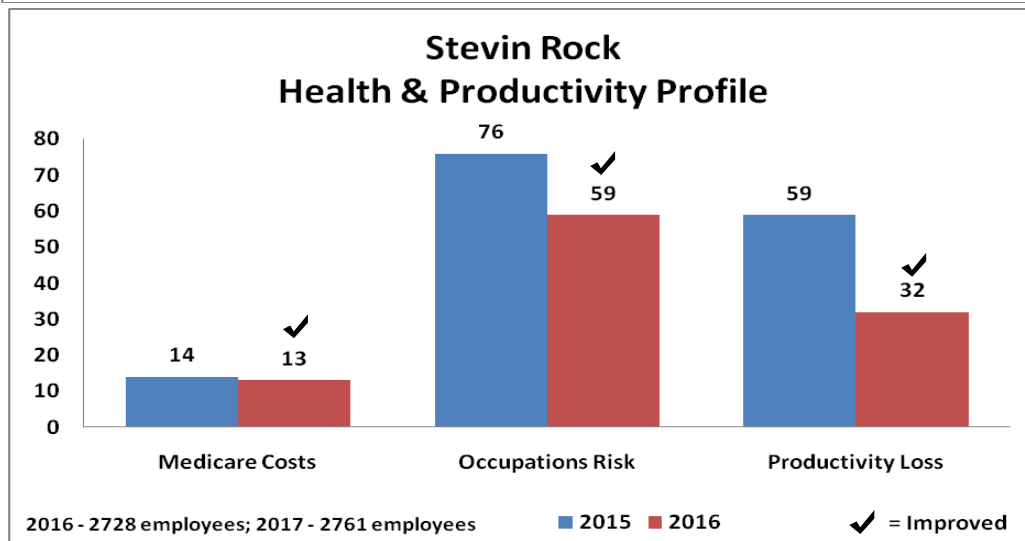

Ras al Khaimah Corporates: Every year we evaluate the Health of about 20 corporate organizations, covering over 10,000 employees. Besides screening, we also conduct Health Education Talks & Sports Events. We repeat this cycle annually and compare current & previous year's data to evaluate the success of our interventions.
